Amazon Integration Module (with Click & Collect)

The Amazon Integration Module provides an additional sales channel to reach both your existing customers and new potential customers. Link your stocked products directly to Amazon Marketplace, and automatically receive orders into the system, ready to be processeed and invoiced.

Key Features include –

- Simple to add your listings to products into Amazon Marketplace directly from NCompass
- Easy to setup & manage
- Automated updating of stock availability and pricing
- Automatic notification of new orders via email
- Automatically download orders into NCompass
- Real-time stock data feeds
- Manage company profile, delivery, returns and refund policy within the Amazon Marketplace
- Supports multiple concurred accounts
- Supports a range of specialist programs, such as Amazon Seller Fulfilled Prime and Amazon on-site FBA

With Amazons **Click & Collect** functionality you can provide customers with access to a local selection of products in the fastest and most convenient way. This is an additional free delivery options which enables customers to pick-up their Amazon orders in store the same or next day.

The NCompass **eBay Integration module** is alike the Amazon Integration module. Further expanding your sales channel to existing and potential new customers.

Place Your Order Today

This module includes some consultancy to get it up and running, which includes some online calls between Amazon, Calculus and yourselves, plus guides to help take you through the required end-user setup within NCompass, such as setting your branch opening hours and how to use the integration.

If you would like us to carry out that setup for you, or would like additional one-to-one training, please add the optional remote training service

Setup	Monthly	Item	Quantity Required
£500	£25 (Minimum)	Amazon Integration Module Costs 10p per transaction, with a minimum charge of £25	1
£600	£- as above	Amazon Click & Collect Integration
