

NCompass Price Engine Repricer

Optimize in-store & online pricing for products, by automatically comparing competitor pricing, calculating competitive retail prices based on configurable pricing rules.

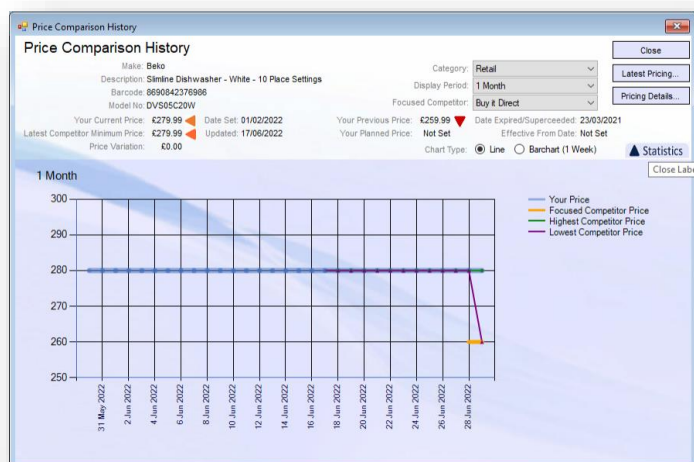

The screenshot shows the configuration interface for a pricing rule. It includes sections for 'Group' (Description: Pricing Rule, Type: Single Rule), 'Applies To' (Agency, Product, Make: Samsung, Department: Televisions > 4K, From/To dates), 'Price Rule Details' (I would like my price to be: Calculated Against: Lowest competitor, I want to be: Lower by 1 £, Which Competitors: All), 'Calculation Preferences' (Round Price to end with), 'Restrictions' (Minimum Price: Higher by 5 %, Calculate Using: Cost, Action if price is lower: Don't change the price), and 'Maximum Price' (Match, Calculate Using: Cost, Action if price is higher: Don't change the price). Buttons for 'New >', 'Edit >', 'Delete', 'Cancel Rule Changes', 'Save Rule', 'Cancel Group Changes', and 'Save and Close' are visible.

Extend the power of your NCompass Advanced Retail system both in-store & online with the price engine repricer. Configure a unique set of rules to calculate Retail Prices and auto-update these to multiple platforms (e.g. Website, Amazon & eBay).

Features include:

- Competitor price data & price comparison history
- Graphical representation of price competitiveness
- Flexible pricing calculation rules, based on NCompass features -
 - Product Agency
 - Department
 - Make
 - Model Number
- Supports multiple price scraping services (e.g. Black Curve, Moonbow)
