

# Enhanced Price Ticketing Module

Print, or digitally display high-quality product display tickets for products in your store.

Generate formatted price tickets on your standard A4 printer using product data from the system, making it easy to keep up-to-date, consistent price tickets across your store. Available in three tiers, our ticketing facilities offer a range of standard tickets, a set of enhanced, graphics-rich tickets, and integration to digital ticketing for the ultimate in convenience.

Features include:

- Range of predefined templates included with module
- Use our design service to add your own custom designs
- Full integration to product database to use product fields, web attributes and custom price ticket content for the display tickets
- Brand and other graphics can be included using our enhanced and digital module
- Prepare a batch of tickets to print in a single run
- Links to update tickets based upon products with price changes which are in stock, or just those which are on display
- Direct link to digital ticketing, with ticket design and preview handled within NCompass – no need to login to a separate system
- Pair digital tickets by simply scanning the product and ticket
- Digital tickets update automatically whenever there is a price change – link this to our supplier integrations, and your Agency product pricing will never fall out of date!

Product Price Changes - 25 records
