

Advanced Routing Module

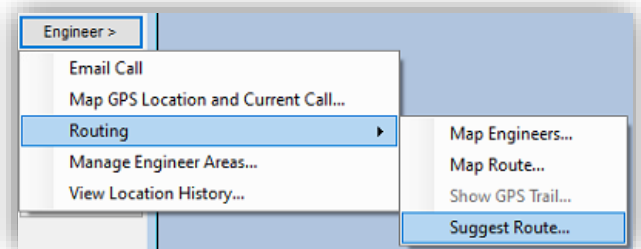

Automatically plan optimized routes for your delivery and service vehicles, calculate estimated time slots, and text those to your customers.

Simply offer any ANYTIME slot to each customer, then text them a time slot the night before. Your customer is happy they are given a smaller timeslot; you save fuel and travel costs, and potentially free up time for additional deliveries each week.

Features include:

- Automatic route suggestion
- Calculates travel time using Google Maps
- Estimates duration for each visit based upon products & services
- Friendly rounding to give customer-friendly time slots for calls
- Drag & drop to reorder if required
- Optionally text the assigned time slots to each customer

Step	Label	Postcode	Estimated Journey Leg Duration	Arrival	Time on Site	Departure	Distance	Requested Time
1	B	TN8 5DQ	22 mins	09:22	45 mins	10:07	12.16 miles	First call am
2	C	TN6 2QX	22 mins	10:29	1 hours, 0 mins	11:29	12.16 miles	09:00 to 10:30
3	D	NG20 9BB	3 hours, 37 mins	15:07	45 mins	15:52	200.88 miles	13:08 to 14:53
4	E	BD8 9SY	1 hours, 16 mins	17:08	1 hours, 0 mins	18:08	60.66 miles	15:09 to 17:09

The **Area Management Module** allows your staff to see a simple colour-coded list of available delivery dates for any given order, filtered by postcode area, engineer skills and engineer availability

The Web Presence 11 **Delivery Date Picker** allows your customers to book their delivery online, based upon stock lead times and real-time checks of your delivery diary

Place Your Order Today

This add-on has a minimum contract term of 12 months; however if you would like to try out, you can cancel without penalty during the first 30 days and only pay the setup fee and one month's service charge.

This module can be remotely activated, and then you simply fill in the easy-to-use setup screen without step-by-step instructions to get started. If you'd like us to set this up for you, or for us to take you through it, add the optional remote training service. Text messages are charged separately, please ask for more information.

Please note that this module does require an active post code look up license to work. If you require a license or wish to check you have one, please contact sales@findesolutions.com.

Setup	Monthly	Item	Quantity Required
